	General			

1	Dimensional requirements, permissible dimensions and torque values are given in tabular form and are applicable to the major subassemblies, as indicated by the table heading. Each table is referenced to the applicable subassembly illustration. The headings in the tables are defined as follows: A. Table of Service Limits (Tables 801 and 802). (1) The figure in the ITEM NUMBER column refers to the item on the appropriate illustration which is referenced in the heading of each table. (2) NOMENCLATURE refers to the item by name and if followed by (ID) or (OD) indicates either the internal diameter or external diameter that dimensions quoted apply to. (3) The NEW DIMENSION column indicates the manufacturing minimum and maximum dimensions of a new part. (4) The PERMISSIBLE WORN DIMENSION column indicates the allowable limit to which an item may wear before replacement is necessary.	801
